

Aluminum Tab Collection & Recycling Project to Benefit Shriners Hospitals for Children®

How many individual tabs are there in one pound?
About 1640 (coffee can)

In the past 22 years, over 1 billion individual tabs have been collected, which is approximately 666,076 lbs.

Current price for recycling can tabs is 55-70 cents per lb.
Why only tabs?

Can tabs are made of pure aluminum and cans are not.

The money raised is used to purchase items for patient care.
